Help

- Format code
- Collapse/expand all code blocks
- Make font bigger/smaller

alt + shift + F

ctrl + shift + minus/plus

alt + mouse scrolling up/down

Maven project style : source code is under src/main/java

Non-Maven project : source code is directly under src

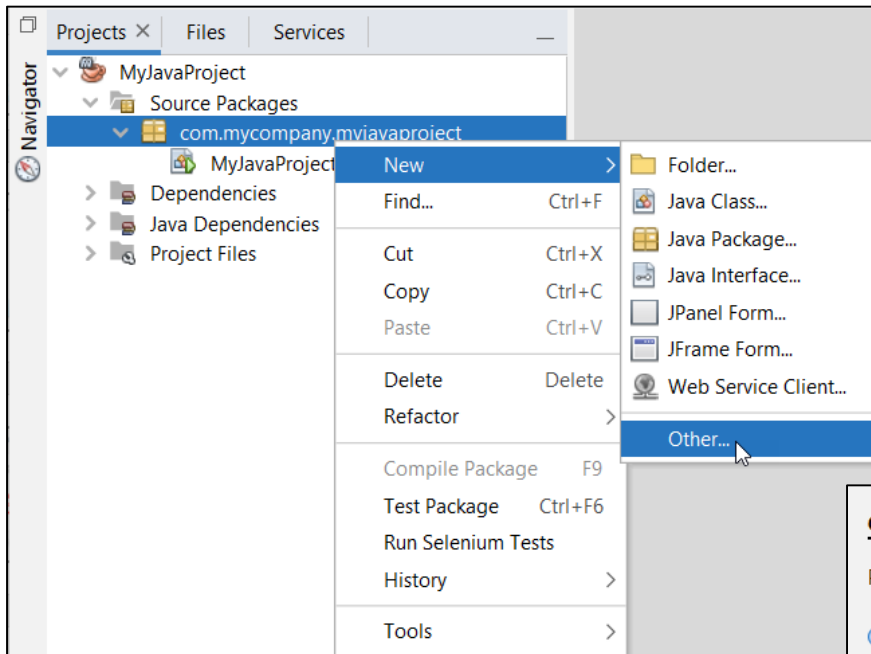

Our source file

Folder structure for source files (corresponding to package com.mycompany.myjavaproject)

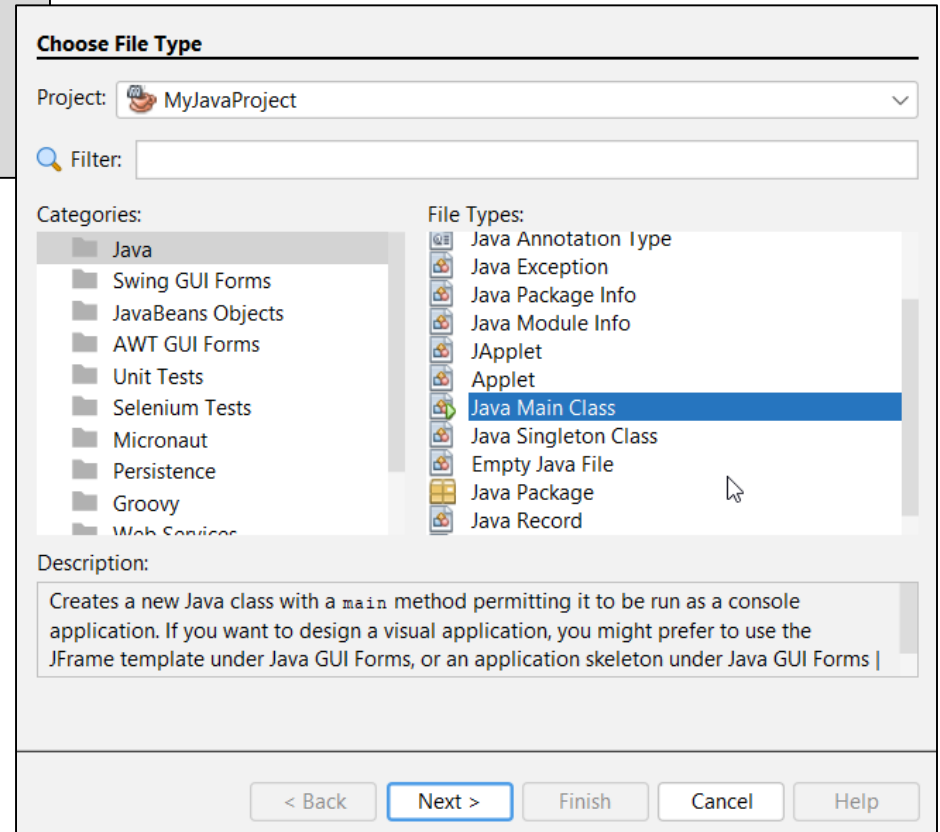

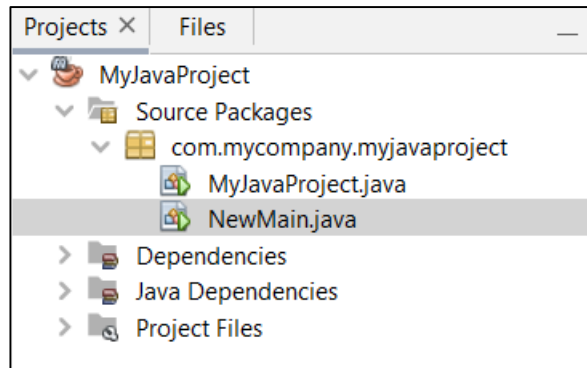

Folder structure for class files (corresponding to package com.mycompany.myjavaproject) → keep MyJavaProject.class

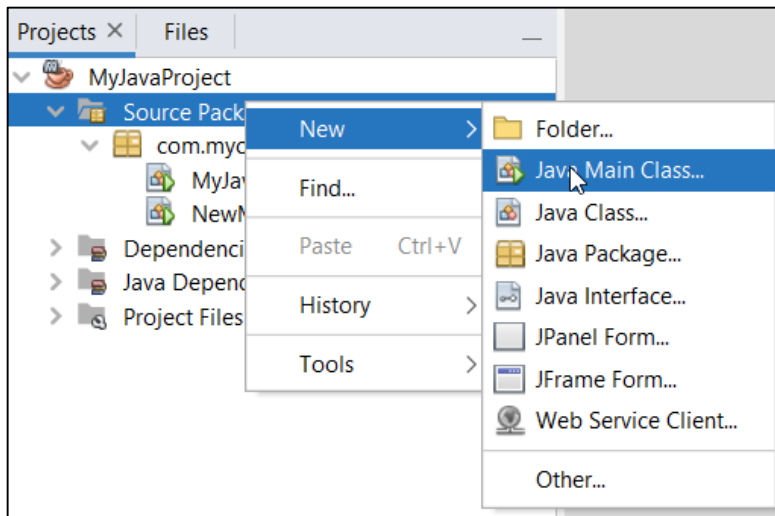

Mavenizing a project

<https://www.faqcode4u.com/faq/332268/what-does-it-mean-to-mavenize-a-project>

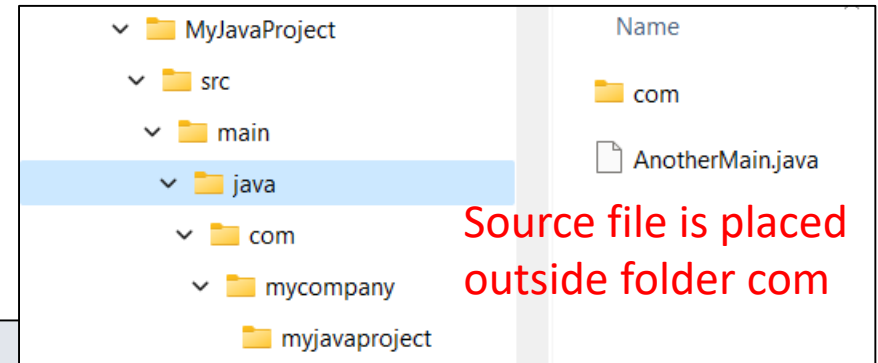

Create new Java file in existing folder  
Right-click folder name

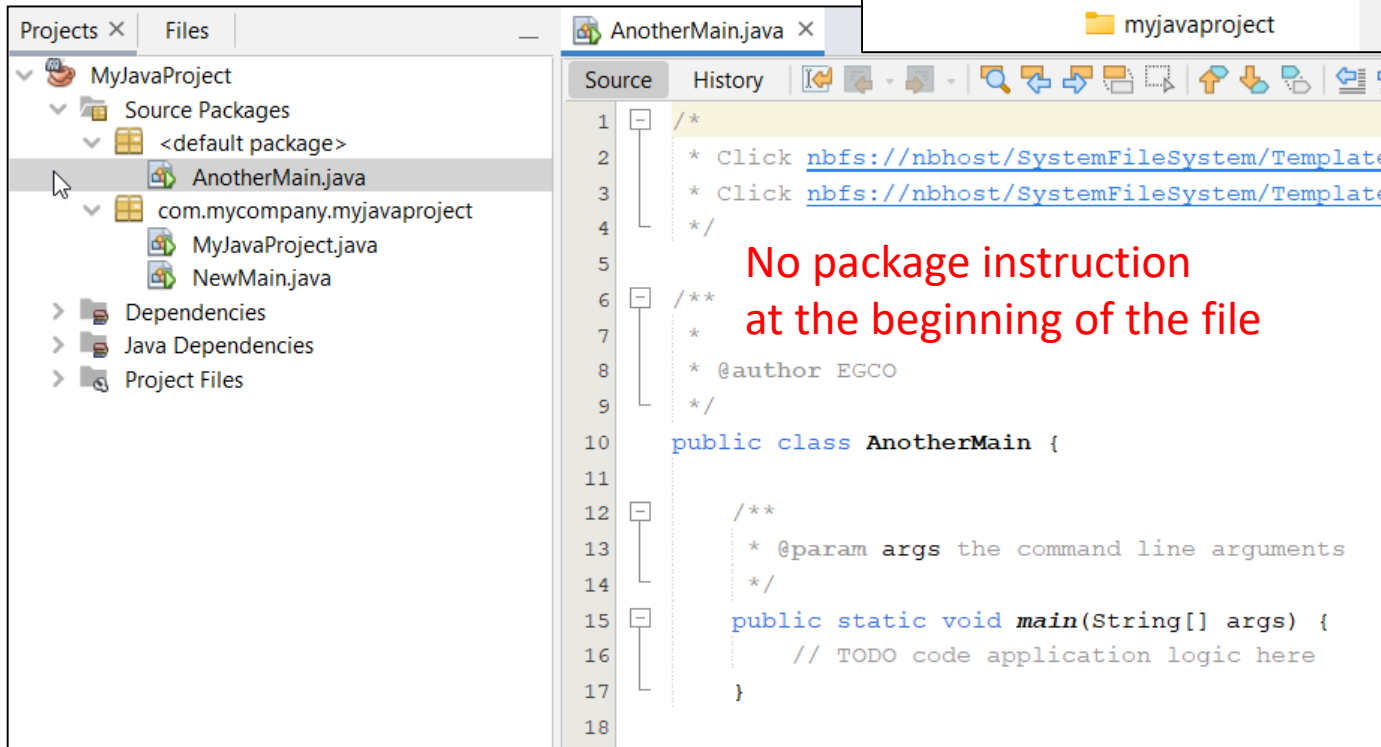

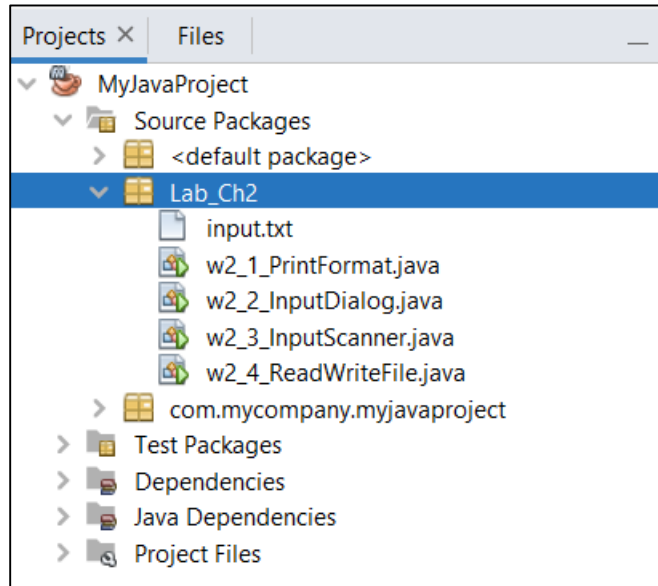

Create new Java file in default folder  
Right-click Source Packages

Source file is placed  
outside folder com

No package instruction  
at the beginning of the file

1. Unzip Lab\_Ch2
2. Drag the whole folder into project
